

Employment Opportunity in Timmins Ontario

Effluent Treatment Plant (ETP) Operator– Full time Position

Denison Environmental Services (DES), a division of Denison Mines Inc., is a trusted industry leader in care and maintenance of closed mines, mine closure planning, and mine decommissioning & rehabilitation. Headquartered in Elliot Lake (ISO 9001:2008 certified) ON, with satellite offices in Rouyn-Noranda QC, Whitehorse YT, Saskatoon SK and Sudbury ON. We are a proven team of experienced project staff.

DES is seeking to fill a full time Effluent Treatment Plant Operator position at our Timmins operations.

Denison offers a competitive compensation and Benefits Package, including Health and Dental coverage, Life insurance, Employee Assistance program, Bonus program and a Retirement Savings plan.

The Ideal Candidate will possess:

- Experience working in Industrial Establishments.
- Experience collecting water samples and performing environmental monitoring.
- Experience with SCADA systems (e.g. RSLogix, IFix, etc.).
- Journeyman Electrician or Instrumentation Certificate a preferential asset.
- Excellent mechanical knowledge
- Well-developed analytical, evaluative and problem solving skills.
- Strong interpersonal communication and writing skills.
- Valid and clean class G driver's licence.

Duties will include:

- Operating the Lime Treatment Plant (LTP) to maintain Acid Collection Pond (ACP) water levels within operating parameters and final effluent quality within allowable discharge limits, as prescribed by the site Environmental Compliance Approval (ECA).
- Ensuring LTP inspections and maintenance for mechanical, instrumentation and electrical are performed as required and that the required critical spares are available.
- Winter snow plowing, when possible, to maintain site access to all required access points.
- Performs LTP equipment repairs or replacement as necessary, when safe to do so.
- Perform or assist with completion of monthly Health and Safety inspections.
- Collecting required surface and groundwater samples and other field data according to an established schedule based on regulatory and internal requirements.
- Ensure collected samples are prepared, sealed and delivered as required.
- Ensuring the integrity of the SCADA system through operation, monitoring and maintenance as required.
- Ensuring lime and other reagent requirements for the LTP are met and that coordination and good communications amongst the Supplier, Operations Superintendent and truck driver are maintained.
- Provide input for monthly and annual reports in relation LTP and pumping station activities.
- Assist with maintenance and review of Operating Manuals and Procedures.
- Report any public complaints, concerns, incidents, accidents or near misses in a timely fashion as required by DES and client.
- Provide site orientation, direction and oversight and ensure safety conformance for any contract or company workers performing work at the Kam Kotia site.

- On-call to respond to site alarm conditions
