

## Employment Opportunity in Timmins Ontario

### Effluent Treatment Plant (ETP) Operator– Casual Position

---

Denison Environmental Services (DES), a division of Denison Mines Inc., is a trusted industry leader in care and maintenance of closed mines, mine closure planning, and mine decommissioning & rehabilitation. Headquartered in Elliot Lake (ISO 9001:2008 certified) ON, with satellite offices in Rouyn-Noranda QC, Whitehorse YT, Saskatoon SK and Sudbury ON. We are a proven team of experienced project staff.

DES is seeking to fill a casual hourly paid Effluent Treatment Plant Operator position at our Timmins operations. This position would fit a retired or semi-retired individual seeking approximately one week of work per month during the months of plant operation to supplement their time and/or pension.

#### The Ideal Candidate will possess:

- Experience working in Industrial Establishments
- Experience collecting water samples and performing environmental monitoring.
- Experience with SCADA systems (e.g. RSLogix, IFix, etc.)
- Journeyman Electrician or Instrumentation Certificate a preferential asset.
- Excellent mechanical knowledge
- Well-developed analytical, evaluative and problem solving skills
- Strong interpersonal communication and writing skills
- Valid and clean class G driver's licence

#### Duties will include:

- Operate the Lime Treatment Plant (LTP) to maintain Acid Collection Pond (ACP) water levels within operating parameters and final effluent quality within allowable discharge limits, as prescribed by the site Environmental Compliance Approval (ECA)
- Ensure LTP inspections and maintenance for mechanical, instrumentation and electrical are performed as required and that the required critical spares are available
- Perform Winter snow plowing, when possible, to maintain site access to all required access points
- Perform LTP equipment repairs or replacement as necessary, when safe to do so.
- Collecting required surface and groundwater samples and other field data according to an established schedule based on regulatory and internal requirements
- Ensure collected samples are prepared, sealed and delivered as required.
- Ensure the integrity of the SCADA system through operation, monitoring and maintenance as required
- Ensure lime and other reagent requirements for the LTP are met and that coordination and good communications amongst the Supplier, Operations Superintendent and truck driver are maintained
- Report any public complaints, concerns, incidents, accidents or near misses in a timely fashion as required by DES and client
- Ensure plant is clean and maintained in a tidy professional manner
- On-call to respond to site alarm conditions

Please forward your resume in confidence by end of day **March 31, 2018** either by e-mail or fax to the attention of: Donna Fournier Office Administrator
