

Employment Opportunity

Senior Environmental Scientist

Denison Environmental Services (DES), a division of Denison Mines Inc., is a trusted industry leader in care and maintenance of closed mines, mine closure planning, and mine decommissioning & rehabilitation. Headquartered in Elliot Lake (ISO 9001:2008 certified) ON, with satellite offices in Whitehorse, YT, Saskatoon, SK and Sudbury, ON. We are a proven team of experienced project staff.

DES is seeking to fill a full time Senior Environmental Scientist position within our consulting group. The consulting group seeks to deliver quality services in the environmental field to our current and future clients. The role will continue to build and develop the consulting business in delivering environmental consulting services including, but not limited to: Completion of Environmental Assessments, MMER programs, permitting, baseline studies, and environmental monitoring. This position will report to the Business Development and Consulting Manager, with the position located in Sudbury and frequent travel as required to work locations throughout Canada.

Denison offers a competitive compensation and Benefits Package, including Health and Dental coverage, Life insurance, Employee Assistance program, Bonus program and a Retirement Savings plan.

Responsibilities:

- Develop new business and service existing clients by working with the DES team to efficiently deliver quality deliverables to multiple clients on time and within budget.
- Participate in business development, proposal submission, and client relationship management.
- Support current projects and operations as required.
- Participation in meetings with communities, government agencies, and existing or potential clients.
- Management of environmental baseline data collection including:
 - Liaison with various consulting / contracting firms and Denison personnel for logistics.
 - Review invoices to ensure charges are justified and within approved agreements.
 - Trouble shooting for problems or issues that arise during the work.
 - Maintain active strategic perspective on data collection to minimize risk & cost while achieving objectives
- Provide strategic direction for EIA process:
 - Reviewing baseline work and identifying data gaps / next steps in comparison to project environment interactions
 - Lead development of Project Description Process.
 - Assess potential project interactions and develop plans to assess potential impacts and options for mitigation.
- Preparation of project reports as required.
- Remain current in changing federal and provincial regulations.

The Ideal Candidate will possess:

- Minimum 10 years' experience.
- Working knowledge of federal and provincial (Ontario and Saskatchewan) environmental regulations and permitting process.
- Experience in Environmental Impact Assessment process including environmental baseline data collection and program planning, impact modelling and regulatory report preparation.
- Proven ability in leading teams of diverse individuals and interacting with people throughout organizations, clients, communities, regulatory agencies, executives, etc.
- Business Development experience.

- Project management experience.
- Well-developed analytical, evaluative and problem solving skills.
- Strong interpersonal communication and writing skills.
