

Geological Technical Services Manager

OUR COMPANY:

Denison Mines Corp. ("Denison") is a uranium exploration and development company with interests focused in the Athabasca Basin region of northern Saskatchewan. Denison is also engaged in mine decommissioning and environmental services through its Denison Environmental Services division and is the manager of Uranium Participation Corp., a publicly traded company which invests in uranium oxide and uranium hexafluoride.

On September 24, 2018 Denison announced the Prefeasibility Study (PFS) for the Wheeler River Project. The PFS incorporates new and innovative approaches to mining in the Athabasca Basin by adoption of In-situ Recovery (ISR) techniques for the high-grade Phoenix uranium deposit. The selection of ISR mining for the Phoenix deposit is a potentially defining moment for Denison as we work to bring the world's lowest cost uranium mining method to the jurisdiction hosting the world's highest-grade uranium deposits. The result is a truly exciting project that has the potential to be the lowest cost uranium mining operation in the world and one of the most environmentally friendly mining operations globally.

With the result of the PFS, Denison is building the project development team and is looking to attract top candidates who want to be a part of our ambitious development story.

THE ROLE:

Reporting to the Vice President Project Development, the position of **Geological Technical Services Manager** will be a key member of the management team and will be responsible for providing technical and operational leadership to the project for all geological and mining aspects, including wellfield and freeze wall development associated with the ISR mine plan for the Phoenix operation. In this role you will lead the project through various project design phases, provide input into the feasibility study, and guide the detailed engineering and environmental assessment processes. Following project approvals, you will be responsible for leading the construction and installation of the ISR wellfield and freeze wall through to operations and production.

This role will be based in Saskatoon, Saskatchewan and will require frequent travel to the project site located in the Athabasca Basin.

This role is being offered as a full-time position. All applicants must be eligible to work in Canada. Denison offers a competitive compensation and Benefits Package, including Health and Dental coverage, Life insurance, Employee Assistance program, Bonus program and a Retirement Savings plan.

OUR IDEAL CANDIDATE:

You are a natural leader and possess excellent communication skills with a demonstrated ability to work in a team environment. You are a well-rounded candidate with a solid track record of success and overcoming challenges in both projects and operations. You possess a strong technical background in geology. In addition, you have:

- Proven successful leadership experience with teams of diverse individuals;
- University degree in geology or mining related field, with a minimum of 10 years practical experience leading drilling and other field programs;
- Experience in ISR operations is strongly preferred;
- Project experience and/or hydrogeological experience would be an asset;
- Experience in managing budgets, schedules, scope, issue escalation and other project management skills in a consulting or contracting environment;
- Strong understanding of the importance of health and safety and environmental sustainability;
- Demonstrated ability to clearly communicate complex issues (i.e. regulatory requirements, work progress, strategic directions, etc.) to key stakeholders and project teams.

Geological Technical Services Manager

YOUR RESPONSIBILITIES:

- Demonstrate strong presence and leadership in the field to project teams through regular and effective site visits;
- Provide technical leadership for the designs of wellfield, freeze wall and other wellfield infrastructure;
- Lead drilling programs and other field activities in a safe and sustainable fashion;
- Prepare reports, budgets and participate in presentations as required;
- Lead external groups including consultants and contractors;
- Prepare and lead procurement processes for consultants and contractors;
- Collaborate and work effectively with other internal departments including: Environment, Safety, HR, Accounting, Procurement, Investor relations and other functional groups;
- Motivate and lead high performance teams by providing mentorship, coaching and supervision to employees and external personnel assigned to the project.

Interested applicants should submit their resume with cover letter to jobs.sk@denisonmines.com. All applicants must be eligible to work in Canada. Please include the job title for which you are applying in the subject line of your email application. We thank all applicants for their interest; however, only those candidates selected for interviews will be contacted.
