

Electrician/Operations Technician

OUR COMPANY:

Denison Mines Corp. ("Denison") is a uranium exploration and development company with interests focused in the Athabasca Basin region of northern Saskatchewan. Denison is also engaged in mine decommissioning and environmental services through its Denison Environmental Services division and is the manager of Uranium Participation Corp., a publicly traded company which invests in uranium oxide and uranium hexafluoride.

Denison's Closed Mine Division, a division of Denison Mines Inc. (DMI), is a trusted industry leader in care and maintenance of closed mines, mine closure planning, and mine decommissioning & rehabilitation. The main office for the Closed Mine Division is located in Elliot Lake, ON, with satellite offices in Whitehorse, YT, and Rouyn-Noranda, QC. DES has a proven team of experienced project professionals.

THE ROLE:

The position of **Electrician/Operations Technician** will perform long term care and maintenance (C&M) activities at various projects primarily in Ontario with primary focus on closed mines in the Elliot Lake area. In addition, the electrician/operations technician provides support in all aspects of mine site decommissioning.

OUR IDEAL CANDIDATE:

- Licensed to perform electrical work in Ontario required;
- Current 309-A construction maintenance licence required;
- Minimum 5 years' Electrician experience required;
- High School Diploma, GED or equivalent;
- Valid Class G driver's license required;
- Licensed to apply herbicide products to control woody vegetation on an asset;
- Experience with routine maintenance operations preferred;
- Highly flexible, with solid interpersonal skills that allow one to work effectively in a diverse working environment;
- Knowledge of safe operating procedures;

YOUR RESPONSIBILITIES:

- **General**
 - Conformance with Health and Safety training requirements defined for this position.
 - Perform Emergency Response Role(s) as assigned by Manager for Client or DES emergencies.
 - Understand and implement DES Quality Management System.
 - Familiarity with conformance with Administrative procedures.
 - Conformance with DMC policies.
- **Position Specific**
 - Performs electrical/Instrumentation troubleshooting and maintenance repairs
 - Performs electrical and instrumentation improvement projects including preparation of single line electrical drawings using ACAD
 - Perform instrumentation adjustments
 - Calibrate electronic equipment (e.g. flow meters)
 - Performs power line inspections
 - Provides labour support for:
 - Application of herbicide products for vegetation control on dams and spillways

Electrician/Operations Technician

- Brushing and tree cutting as required for vegetation control or the removal of downed trees as part of the site care and maintenance requirements
- Beaver dam deconstruction
- Care and maintenance of treatment plants and all aspects of plant equipment
- Reagent mixing, as assigned
- Care and maintenance of site infrastructure such as gates, piping, etc.
- Carpentry and concrete formwork activities for all types of infrastructure construction
- Maintenance and repair of vehicles and equipment, power tools, pumps and electrical generators
- Routine maintenance of mobile equipment including loaders, backhoe, forklifts and skid-steers when required
- Participates in the investigation and development of corrective and preventive actions.

Interested applicants should submit their resume with cover letter to jobs@denisonmines.com. All applicants must be eligible to work in Canada. Please include the job title for which you are applying in the subject line of your email application. We thank all applicants for their interest; however, only those candidates selected for interviews will be contacted.
