

Technical Services Field Assistant - Temporary

OUR COMPANY:

Denison Mines Corp. ("Denison") is a uranium exploration and development company with project interests in the Athabasca Basin region of northern Saskatchewan and office operations based in Saskatoon, Saskatchewan. Denison is a public company listed on the NYSE American and TSX stock exchanges, and is also engaged in mine care and maintenance for decommissioned mine sites through its Closed Mines group based in Elliot Lake, Ontario. Denison's flagship project is the Wheeler River Uranium Project ("Wheeler River"), which is located approximately 35 km north-northeast of Cameco's Key Lake Operation and 35 km southwest of Cameco's McArthur River Operation in the eastern portion of the Athabasca Basin. The Project is accessible by vehicle and is located about 5 km west of Highway 914.

Wheeler River is the largest undeveloped uranium project in the eastern portion of the Athabasca Basin region in northern Saskatchewan, Canada. A Pre-Feasibility Study ("PFS") was completed in accordance with NI 43-101 in September 2018 highlighting the selection of the in-situ recovery ("ISR") mining method for the development of the high-grade Phoenix deposit. On September 22, 2021 Denison announced the initiation of the Feasibility Study ("FS") for Wheeler River. Concurrently, Denison is also advancing the environmental assessment ("EA") process which is a critical step to securing the approvals necessary to develop and operate a mine in Canada.

With the advancement of the ISR mining method, Wheeler River has the potential to be one of the lowest-cost and most environmentally sustainable uranium mining operations in the world.

In addition to supporting the Company's efforts directed at the advancement of Wheeler River, Denison's exploration team continues to actively pursue the growth of the Company's uranium resource base including an objective to discover of additional ISR amenable uranium resources in the Athabasca Basin region.

THE ROLE:

Denison is looking to fill the role of Temporary **Technical Services Field Assistant** to engage with the Wheeler River Project team in support of Denison's 2022 field programs.

Reporting to the Denison Field Lead, the primary responsibilities of the **Field Assistant** is to perform field tests and collect field data, actively participate in various geological, environmental, and drilling programs, and provide support to the Project team on other field and office related activities as required.

The role is being offered as a temporary position starting on or about **February 1, 2022** for a 6-12 month term.

The position is based at Denison's Wheeler River Project site, working on a 2-week on / 2-week off rotation. The successful candidate will be responsible for arranging their own travel to a designated pick-up point en-route from Denison's Saskatoon office to the Project site. Denison will provide board and lodging while at the Project site.

The successful candidate will be required to follow and enforce Denison's health and safety policies and procedures, including the Covid-19 Work Safe plan and Covid-19 vaccination protocol. All current staff and any visitors who will attend Denison's offices, warehouses, field sites and operations are required to be vaccinated for Covid-19. New staff will be required to be fully vaccinated at their commencement of employment and/or prior to attending any facilities.

Denison is committed to providing employment opportunities for Indigenous people and members of the communities near where we operate, and encourage applicants who are Indigenous and / or residents of those communities to apply and to voluntarily self-identify the appropriate information in their application details.

OUR IDEAL CANDIDATE:

Technical Services - Field Assistant

You are organized and have a strong sense of responsibility. You have excellent technical skills and previous field experience working on exploration drilling programs. In addition, you have:

- 1-2 years of relevant work experience (e.g., field work, mining industry), experience in the uranium industry is considered an asset.
- Experience and a willingness to work with high-grade uranium mineralization.
- Capable of learning field test procedures and follow directions.
- A commitment to Health and Safety in the workplace.
- Ability to interact successfully with all levels of staff, contractors, and vendors.
- Possession of a valid Driver's License
- Working knowledge of Microsoft Word and Excel is preferred.
- Experience driving an ATV, first aid training, and previous work experience in a remote location is considered an asset.

YOUR RESPONSIBILITIES:

- Work closely with and follow the direction of the Denison Field Lead
- Actively participate in a variety of geological, environmental, drilling, and field programs both at the Project site and regionally, including:
 - geological core logging, sampling, downhole borehole logging
 - geotechnical core logging and investigation
 - permeametry data collection and sampling
 - hydrogeological investigations
 - environmental baseline data collection
 - other duties as directed by Denison Field Leads
- Follow Standard Operating and Work Procedures
- Work outdoors with flexible working hours (up to 11 hours per day)

Interested applicants should submit their resume with cover letter to jobs.sk@denisonmines.com. Please include the job title for which you are applying to in the subject line of your email application. We thank all applicants for their interest; however, only those candidates selected for interviews will be contacted.
