

Environment Lead

OUR COMPANY:

Denison Mines Corp. ("Denison") is a public company listed on the NYSE American and TSX stock exchanges focused on the advancement of a portfolio of uranium exploration and development project interests in the Athabasca Basin region of northern Saskatchewan. Denison is also responsible for mine care and maintenance of its decommissioned mine sites in Elliot Lake, Ontario.

Denison's flagship project is the Wheeler River Uranium Project (the "Project"), which is the largest undeveloped uranium mining project in the infrastructure-rich eastern portion of the Athabasca Basin region in northern Saskatchewan. The Project is located approximately 35 km north-northeast of Cameco's Key Lake Operation and 35 km southwest of Cameco's McArthur River Operation in the eastern portion of the Athabasca Basin. The Project is accessible by vehicle and is located about 5 km west of Highway 914.

In August 2023, Denison filed (i) the Feasibility Study ("Phoenix FS") completed for In-Situ Recovery ("ISR") mining of the high-grade Phoenix uranium deposit ("Phoenix") and (ii) a cost update to the 2018 Pre-Feasibility Study for conventional underground mining of the basement-hosted Gryphon uranium deposit ("Gryphon"). With the successful completion of the Phoenix FS, Denison has advanced the planned Phoenix ISR project through the technical de-risking process and has already commenced the first phases of project execution. Concurrently, Denison is also advancing the environmental assessment ("EA") process, which is a critical step to securing the approvals necessary to develop and operate a mine in Canada.

The planned Phoenix ISR operation is on track to become the first ISR uranium mining operation in Canada and has the potential to be one of the lowest-cost and most environmentally sustainable uranium mining operations in the world.

Denison is building the Wheeler Project development team and is looking to attract top candidates who want to be a part of our ambitious development story.

THE ROLE:

The key objective of the **Environment Lead** role is to provide support for the regulatory permits required to successfully advance the Wheeler River Project through construction and operation. The Environment Lead will further provide regulatory support for other exploration projects within Denison strategic portfolio. This position will report to the Manager, Environment and Regulatory.

This role is being offered as a full-time position. All applicants must be eligible to work in Canada. Denison offers a competitive compensation and Benefits Package, including Health and Dental coverage, Life insurance, Employee Assistance program, Bonus program and a Retirement Savings plan.

This role will be based in Saskatoon, Saskatchewan. The role will require occasional travel to project sites located in the Athabasca Basin. The successful candidate will be required to follow Denison's health and safety policies and procedures.

Denison is committed to providing employment opportunities for Indigenous people and members of the communities near where we operate, and encourage applicants who are Indigenous and / or residents of those communities to apply and to voluntarily self-identify the appropriate information in their application details.

OUR IDEAL CANDIDATE:

You have a background in regulatory permitting, planning studies, and environmental assessments. You have strong leadership and communication skills with a demonstrated ability to work in a team environment. You are a well-rounded candidate with a solid track record of success and overcoming challenges in your career. In addition, you have:

Senior Coordinator, Environment

- 7 to 10 years experience in regulatory permitting for resource projects.
- Bachelor's degree in environmental science, engineering or equivalent (i.e., a technical diploma >7 years of applicable experience).
- Knowledge of and experience in approvals and permitting for uranium projects under the jurisdiction of the Canadian Nuclear Safety Commission and the Saskatchewan Ministry of Environment.
- Professional designation or eligibility to obtain profession designation in SK (P.Eng, P.Geo, or P.Ag) would be considered an asset.
- Knowledge of applicable provincial and federal environmental legislation, regulations, standards and guidelines to understand application and implementation requirements at each project phase, such as: The Nuclear Safety and Control Act, Environmental Management and Protection Act, the Mineral Industry Environmental Protection Regulations, The Waterworks and Sewage Works Regulation, the Fisheries Act, the Metal Diamond and Mining Effluent Regulations, the Canadian Environmental Protection Act and associated regulations.
- Excellent verbal/written communication, organizational and time management skills, attention to detail and the ability to operate with a high degree of accuracy.
- Experience with Microsoft Office (Excel, Word, PowerPoint, Teams, Outlook).

YOUR RESPONSIBILITIES:

- Prepare and support permitting and licence applications for Denison projects.
- Leads the development of application strategies to achieve efficient approval timelines that align with the technical objectives of the project.
- Work collaboratively with technical teams and proactively identify opportunities to streamline permitting processes.
- Communicate with the Saskatchewan Ministry of Environment on approvals, permitting and future compliance requirements for Wheeler River.
- Provide expert technical input and guidance on the application of regulatory and permitting requirements for a uranium mine and processing facility in northern Saskatchewan.
- Support budgeting and scheduling for the environment and permitting team with a focus on continual improvement and optimization to meet Denison's timeline for construction and operation.
- Support engagement activities and participate in meetings with Indigenous communities and the public on key areas of interest applicable within the environmental effects and regulatory approvals.
- Support the development of the environmental monitoring database to support permit reporting requirements.
- Prepare and coordinate annual compliance reports for submission to Federal and Provincial regulators.
- Remain current on changes to regulatory requirements to understand how they apply to or impact the progression of approvals, development, and operation for current and future projects.

Interested applicants should submit their resume with cover letter to jobs.sk@denisonmines.com. All applicants must be eligible to work in Canada. Please include the job title for which you are applying in the subject line of your email application. We thank all applicants for their interest; however, only those candidates selected for interviews will be contacted.
