

Summer Student Internship - Hydrogeology

Denison is redefining mining by *Powering People, Partnerships and Passion*. We are trailblazers in uranium mining, adopting an innovative climate positive approach to mining by deploying ISR methods and building durable partnerships with Indigenous groups in northern Saskatchewan. As a *Certified™ Great Place to Work®* our success is fueled by empowering employees with engaging work, unique development opportunities, and lucrative rewards – resulting in an exceptionally talented, diverse, and motivated team throughout all levels of the organization. Flexible and agile thinking ensures our workplace is one where talent thrives, innovation flourishes, and people have fun leveraging their passions to create powerful partnerships and positive results.

SUMMER INTERNSHIP PROGRAM:

Denison is recruiting for several summer internship opportunities for university students located in Saskatoon. Work terms are from May to August. Opportunities are available in the following areas of study:

- Geology
- Metallurgy
- Hydrogeology
- Environmental Sciences
- Engineering
- Finance and Business

Students who are hired to work in the Saskatoon office follow regular Monday to Friday office hours. Students who work in field locations work a fourteen day in / fourteen day out rotation. Certain roles will offer the opportunity of a mixed office / field location experience.

POSITION OVERVIEW:

We are seeking a motivated university student currently enrolled in a Hydrogeology, Geology, Environmental Science, or related program to join our team. This position provides an exciting opportunity to work alongside experienced professionals and gain practical experience in hydrogeological data collection, analysis, and reporting to support our exploration and development activities. The **Hydrogeological Student** will report to the Principal Hydrogeologist and will work primarily in office with occasional travel to the Company's field location(s).

Our ideal candidate:

- Currently enrolled in a Hydrogeology, Geology, Environmental Science, or related university program.
- Strong analytical and problem-solving skills.
- Familiarity with hydrogeological models and system software.
- Ability to work both independently and as part of a team.
- Excellent communication and report-writing skills.
- Safety-conscious with a strong attention to detail.

YOUR RESPONSIBILITIES:

- Assist in water flow model development, testing and analysis.
- Support hydrogeological investigations, including aquifer testing and permeability assessments.
- Compile, analyze, and interpret hydrogeological data to support site assessments.
- Contribute to technical reports and presentations.
- Collaborate with geologists, engineers, and environmental professionals on water flow models.
- Follow safety protocols and best practices for fieldwork and data handling.

OUR COMMITMENT:

Denison is dedicated to creating employment opportunities for Indigenous individuals and residents of the communities in which we operate. We encourage Indigenous applicants and those from these communities to apply and to voluntarily provide relevant information in their application. Preference will be given to qualified Indigenous candidates.

At Denison, we place a high value on diversity of backgrounds and experience. We strive to create an inclusive workforce that reflects a wide range of cultures, backgrounds, and viewpoints. Our team members are empowered to excel based on their personal merit, qualifications, experience, ability, and job performance. Reasonable accommodations during the hiring process are available upon request. Applicants for this role must be eligible to work in Canada.

TO APPLY:

Submit your resume, current transcript of grades and cover letter, by **EMAIL: jobs@denisonmines.com** and put the title **"Summer Internship - Hydrogeology"** in the subject line.

OUR COMPANY:

Denison Mines is a publicly traded company and a Certified Great Place to Work® with a 70-year legacy of uranium mining, exploration, and development in Canada. The company has an effective 95% interest in its flagship Wheeler River Project, which is the largest undeveloped uranium project in the eastern portion of the prolific Athabasca Basin region of northern Saskatchewan. Denison also owns interests in the McClean Lake uranium mines and mill, the Midwest project, the Waterbury Lake project. Collectively, Denison has a project portfolio covering ~385,000 hectares in northern Saskatchewan.
