

Seasonal Labourer

Denison is redefining mining by *Powering People, Partnerships and Passion*. We are trailblazers in uranium mining, adopting an innovative climate positive approach to mining by deploying ISR methods and building durable partnerships with Indigenous groups in northern Saskatchewan. As a *Certified™ Great Place to Work®* our success is fueled by empowering employees with engaging work, unique development opportunities, and lucrative rewards – resulting in an exceptionally talented, diverse, and motivated team throughout all levels of the organization. Flexible and agile thinking ensures our workplace is one where talent thrives, innovation flourishes, and people have fun leveraging their passions to create powerful partnerships and positive results.

THE ROLE:

The position of **Seasonal Labourer** is responsible for performing general labour support for the long-term care and maintenance (C&M) activities at various projects primarily on closed mine sites in the Elliot Lake area.

This role is a fixed-term contract position based in Elliot Lake, Ontario, starting on or around May 1, 2025, with an anticipated term of approximately 4 months, with the possible opportunity for contract extension.

OUR IDEAL CANDIDATE:

The Seasonal Labourer excels at carrying out hands-on and manual activities and enjoys being outdoors. As a flexible, hard-working and reliable contributor, you are committed to performing all work activities safely and efficiently and are comfortable and capable of working both independently and as part of a team. Additional qualifications and attributes include:

- High school diploma required.
- 1-2 years demonstrated experience working in a mine or industrial site strongly preferred.
- Basic proficiency using computers and technology required, specifically Microsoft Outlook, Word and Excel, accompanied by the willingness to learn new skills and technology as required.
- Reliable, punctual, self-motivated and able to work both independently and in a team environment.
- An ability to effectively identify and resolve problems and recommend solutions.
- Strong verbal and written communication skills.
- Ability to read, understand and follow work instructions in a safe, accurate and timely manner.
- Good interpersonal skills that promote safe, collaborative, and inclusive relationships with colleagues, vendors, and contractors.
- Exhibits an uncompromising commitment to always working safely, and reporting and resolving hazards or unsafe conditions immediately.
- Willing and able to carry out physical duties associated with this role, including but not limited to being able to lift up to 50 lbs, engage in recurring bending or similar activities, hike several kilometres on uneven ground while carrying a 7kg backpack, and work outdoors in varying weather conditions.
- Possession of a Drivers' License that is valid and in good standing is required.
- Ability to wear and use personal protective equipment (PPE) as required and assigned.

YOUR RESPONSIBILITIES:

Equipment & Field Operations:

- Carry out brush and/or snow removal, clearing of beaver dams, and road maintenance activities.
- Perform various building maintenance activities as needed and required.
- Clean, inspect, organize, and maintain vehicles, equipment, power tools, pumps, and generators in good repair.
- Willing to learn to operate Effluent Treatment Plants and Water Sampling
- Transport reagents and clean reagent tanks as required.
- Safely and effectively operate various hand and power tools.
- Organize and maintain field supplies, including sample bottles, measuring tools, and safety gear.

- Operate, maintain, and calibrate field monitoring equipment and testing devices as trained and assigned.
- Participate in site maintenance, including plant upkeep, dam slope care, and minor repairs.

Documentation & Reporting:

- Complete field reports, and Workplace Hazard Analysis (WHA) forms.
- Conduct pre-operational checks of light vehicles, completing daily reports and logbooks as required.
- Contribute to internal/external reports and SOP development.
- Complete various logs and checklists as required.

Health, Safety & Collaboration:

- Adhere to health, safety, and environmental protocols.
- Work collaboratively with internal teams and external contractors.
- Ensure tasks comply with company policies, environmental regulations, and best safety practices.

The successful candidate shall also:

- Carry out the responsibilities of this site-based position on a Monday to Friday schedule.
- Participate in emergency/spill and on-call support as required.
- Understand that regular job duties are performed across a large physical area in the vicinity of the operation; Operating passenger vehicles, all-terrain vehicles, and boats is a requirement for this position.
- Be comfortable working independently and at times work in remote locations with a partner.
- Perform other duties as assigned.
- Understand that this role is subject to background verification checks as part of the pre-employment screening process and as required thereafter in accordance with company policy.
- Be legally authorized to work in Canada.

OUR COMMITMENT:

Denison is dedicated to creating employment opportunities for Indigenous individuals and residents of the communities in which we operate. We encourage Indigenous applicants and those from these communities to apply and to voluntarily provide relevant information in their application. Preference will be given to qualified Indigenous candidates.

At Denison, we place a high value on diversity of backgrounds and experience. We strive to create an inclusive workforce that reflects a wide range of cultures, backgrounds, and viewpoints. Our team members are empowered to excel based on their personal merit, qualifications, experience, ability, and job performance. Reasonable accommodation during the hiring process is available upon request.

OUR COMPANY:

Denison Mines is a publicly traded company and a Certified Great Place to Work® with a 70-year legacy of uranium mining, exploration, and development in Canada. The Denison Mine in Elliot Lake, Ontario, closed in 1992. The decommissioned Denison mine site contains two flooded tailings management areas (TMAs) (Denison TMA 1 and Denison TMA 2) and two effluent treatment plants (ETP). The company has an effective 95% interest in its flagship Wheeler River Project, which is the largest undeveloped uranium project in the eastern portion of the prolific Athabasca Basin region of northern Saskatchewan. Denison also owns interests in the McClean Lake uranium mines and mill, the Midwest project, and the Waterbury Lake project. Collectively, Denison has a project portfolio covering ~385,000 hectares in northern Saskatchewan.
