

Site Services and Utilities Supervisor

Denison is redefining mining by *Powering People, Partnerships and Passion*. We are trailblazers in uranium mining, adopting an innovative climate positive approach to mining by deploying ISR methods and building durable partnerships with Indigenous groups in northern Saskatchewan. As a *Certified™ Great Place to Work®* our success is fueled by empowering employees with engaging work, unique development opportunities, and lucrative rewards – resulting in an exceptionally talented, diverse, and motivated team throughout all levels of the organization. Flexible and agile thinking ensures our workplace is one where talent thrives, innovation flourishes, and people have fun leveraging their passions to create powerful partnerships and positive results.

THE ROLE:

Reporting to the Manager of Operational Readiness, the **Site Services and Utilities Supervisor** is responsible for overseeing the planning and execution of site services activities and the operation and maintenance of primary utilities as it relates to the daily site operations. The supervisor will direct work of operations personnel and serve as the key liaison between the construction management team, camp management staff, contractors, employees, and Denison's Saskatoon Office. The **Site Services and Utilities Supervisor** works closely with maintenance, health and safety, environmental, regulatory, and administrative personnel to ensure that site infrastructure is maintained and operated in a manner that ensures the safety of workers and compliance to legislative requirements and commitments.

This position is a **full time, permanent role**, based at Denison's flagship Wheeler River Project site, located in the northern Athabasca Basin of Saskatchewan, requiring a **2-week rotation** (2 paid travel days, 14 days of work, 12 unpaid days off). Denison will provide meals and accommodations during the rotation and will arrange transportation to the Project Site from a designated central pick-up location along the route. The successful candidate will be expected to meet at the specified pick-up point prior to traveling to the site. To qualify for this role, applicants must be eligible to work in Canada.

OUR IDEAL CANDIDATE:

Having direct experience in remote settings and past opportunities to oversee some or all aspects of site services operations including waste management, road clearing and grading, generator operation and maintenance, potable water and wastewater treatment plant oversight, you bring a strong sense of responsibility and service-orientation to the position. Accompanied by solid communication and computer skills, you bring a strong work ethic, excellent attention to detail, and demonstrated competency in being able to identify and resolve complex problems with relative autonomy. Additional qualifications and attributes include:

- Experience Supervising and coordination of site services including utilities (water, wastewater, power, propane), waste management, road maintenance, and general infrastructure.
 - Proficiency ensuring compliance with safety, environmental, and regulatory standards.
 - Experience managing and scheduling maintenance activities for utility systems and site facilities.
 - Competence with supervision of contractors and service providers, ensuring quality and timely delivery of services.
 - Experience managing and monitoring budgets and control costs related to site services and utilities.
 - Experience conducting inspections and audits to identify areas for improvement or repair.
 - Competence collaborating with other departments to support operational needs and project planning.
-
- Minimum 5 years' relevant experience working in a supervisory role within a remote setting is required; mining or industrial industry experience is preferred.
 - Experience in civil works, roadway maintenance, materials movement, and contractor management.
 - Operations oversight to ensure the safe operation of wastewater and potable water treatment plants and other future service utilities as they come online during the construction of the Wheeler River Operation.
 - Experience with scheduling and/or (CMMS) computerized maintenance management system software-accompanied by a willingness to learn and use other technologies and software as required.
 - Exhibits an uncompromising commitment to always working safely, and reporting and resolving hazards or unsafe conditions immediately.
 - Possession of a Class 5 Drivers' License that is valid and in good standing is required.
 - Ability to wear and use personal protective equipment (PPE) as required and assigned.
 - First Aid Certification must be valid at time of hire, or willingness to become certified prior to commencing employment.

- Willingness and ability to work on a 2-week rotation in a remote mining camp in northern Saskatchewan.

YOUR TASKS & RESPONSIBILITIES:

- Management, coordination, and oversight of a contract workforce responsible for roadway infrastructure maintenance, waste management, snow clearing, materials handling and receiving, and other general site services work.
- Management, coordination, and oversight of a contract workforce responsible for the maintenance and upkeep of mechanical and electrical site-based infrastructure including water and wastewater treatment plants, electrical infrastructure including diesel generators, HVAC systems, building services, fuel distribution systems, etc.
- Supervising utilities operators responsible for the operation and basic upkeep of site utilities and water treatment plants
- Responsible for the general operation, upkeep and maintenance of site, facilities and equipment supervision and scheduling of work and personnel, and the timely and accurate completion of necessary documentation and records.
- Ensure the safe, effective and efficient operation of primary operating utilities required to support current and future site activities necessary for the construction of the Wheeler River Operation.
- Maintain the site, facilities and equipment in good working order, ensuring deficiencies are promptly reported and scheduled for repair and any hazard mitigation activities are taken and communicated for the protection and safety of personnel on site.
- Complete morning briefing and planning meetings, reviewing daily work schedules and priorities.
- Conduct toolbox talks and safety briefings with site services and construction management team.
- Supervise all required inspections and reporting according to daily, weekly and monthly schedules, and when required ensuring necessary corrective actions are completed in a reasonable timeframe.
- Maintain accurate records of maintenance, permits, logs, inspections, safety checks and service activities. Accurately compile data in a timely manner to facilitate informed decision-making and effective cross-shift handover. Review of maintenance logs and verification of completion of scheduled tasks.
- Respond to emergencies and troubleshoot utility-related issues promptly.
- Provide reporting and communicate updates to management and relevant stakeholders
- Evaluate, identify and execute improvements to business processes and procedures for enhanced efficiency, quality, and safety.
- Enforce Denison's health and safety protocols diligently and consistently, including PPE requirements, and support safety programs and safety audits as necessary to identify and mitigate risks.
- Provide insight and support to the procurement team as needed to ensure goods and services are obtained in a manner that maximizes efficiency in terms of price, delivery and suitability.
- Ensures comprehensive understanding of contractor management requirements and project permits, always ensuring compliance with these requirements.

We appreciate the interest of all applicants; however, only those selected for interviews will be contacted.

All applicants must be eligible to work in Canada. Denison offers a competitive compensation and benefits package, including health and dental coverage, and a retirement savings plan.

OUR COMMITMENT:

Denison is dedicated to creating employment opportunities for Indigenous individuals and residents of the communities in which we operate. We encourage Indigenous applicants and those from these communities to apply and to voluntarily provide relevant information in their application. Preference will be given to qualified Indigenous candidates.

At Denison, we place a high value on diversity of backgrounds and experience. We strive to create an inclusive workforce that reflects a wide range of cultures, backgrounds, and viewpoints. Our team members are empowered to excel based on their personal merit, qualifications, experience, ability, and job performance. Reasonable accommodation during the hiring process are available upon request. Applicants for this role must be eligible to work in Canada.

OUR COMPANY:

Denison Mines is a publicly traded company and a Certified Great Place to Work® with a 70-year legacy of uranium mining, exploration, and development in Canada. The company has an effective 95% interest in its flagship Wheeler River Project, which is the largest undeveloped uranium project in the eastern portion of the prolific Athabasca Basin region of northern Saskatchewan. Denison also owns interests in the McClean Lake uranium mines and mill, the Midwest project, the Waterbury Lake project. Collectively, Denison has a project portfolio covering ~385,000 hectares in northern Saskatchewan.
